Saint Mary's Health Plans

A member of CHW

Centers of Excellence Program

A Center of Excellence (COE) is a health care facility or provider that meets Saint Mary's Health Plans' (SMHP) high standards for quality and value. The facilities and providers that are selected to participate in this program provide our members who have certain specific conditions with care at some of the highest quality facilities in the region. SMHP members not only benefit from the high-quality of care received at these facilities, but may be eligible for travel benefits to use during their course of treatment.

The Centers of Excellence program features health care facilities which create health care value by demonstrating positive patient outcomes, cost-efficient health care delivery and compliance with rigorous quality control metrics.

About SMHP Centers of Excellence

- Members are required to use Centers of Excellence facilities associated with specific medical conditions or surgical procedures, unless the use of a non-COE facility has been prior authorized by SMHP's Medical Management department.
- Travel benefits of up to \$3,000 per treatment may be available when using a COE facility.
- Use of a non-COE facility for designated conditions will result in benefits being paid at the out-of-network level and a much higher member expense, unless the use of a non-COE facility has been prior authorized by SMHP's Medical Management department.
- Standard prior authorization requirements still apply.

Centers of Excellence Medical Categories

Bariatric Surgery – COE participating Bariatric surgery facilities meet SMHP quality measures of clinical performance, access and efficiency for Bariatric surgery. The chosen facilities for Bariatric surgery (weight loss surgery) have consistently shown excellent outcomes, lower complication rates and lower mortality rates. SMHP promotes a continuum of care with these facilities which promote the pre-surgical work required of members who receive Bariatric surgery. *Participating SMHP Centers of Excellence include: Saint Mary's Regional Medical Center (Reno).*

– continued on reverse –

SMHP Centers of Excellence Program

(continued)

Complex Cardiac Care – COE participating complex cardiac care facilities meet SMHP quality measures of clinical performance, access and efficiency for cardiac care, and include comprehensive heart and vascular treatment for both inpatient and outpatient procedures. An SMHP Nurse Case Manager works with the member, the member's physician and the COE to promote the continuum of care and enhance the patient experience. *Participating SMHP Centers of Excellence include: Saint Mary's Regional Medical Center (Reno), University of Utah Medical Center (Salt Lake City).*

Complex Cancer Care – COE participating complex and rare cancer facilities meet SMHP quality measures of clinical performance, access and efficiency for cancer care. These cancer centers can provide both inpatient and outpatient procedures. An SMHP Nurse Case Manager will work with the member and the member's physician to ensure the member is being treated by specialists and at a facility that are both experienced with the member-diagnosed form of cancer. *Participating SMHP Centers of Excellence include: Huntsman Cancer Institute (Salt Lake City), University of Utah Medical Center (Salt Lake City).*

Complex Orthopedic Conditions – COE participating complex orthopedic care facilities meet SMHP quality measures of clinical performance, access and efficiency for orthopedic care and can provide both inpatient and outpatient procedures. Additionally, by incorporating the Centers of Excellence program into member treatment for certain orthopedic conditions, a significantly reduced cost of care is passed along to the member. *Participating SMHP Centers of Excellence include: Saint Mary's Regional Medical Center (Reno), University of Utah Medical Center (Salt Lake City).*

Complex Pediatric Conditions – COE participating complex pediatric care facilities meet SMHP quality measures of clinical performance, access and efficiency for pediatric care and can provide both inpatient and outpatient procedures. Pediatric Care may include complex cancer, complex surgical procedures and orthopedic procedures. The Centers of Excellence program can help direct necessary child health care to a facility that specializes in certain conditions at an age appropriate level. *Participating SMHP Centers of Excellence include: Intermountain Healthcare – Primary Children's Medical Center (Salt Lake City on the University of Utah Medical Center campus).*

Organ or Tissue Transplants – Transplant Hospitals that have met extensive quality, as well as cost-effectiveness criteria have been selected by Saint Mary's Health Plans to participate in its COE program. *Participating SMHP Centers of Excellence include: National Tethys Transplant Network, which includes the University of Utah Medical Center (Salt Lake City).*
